

KhetHub Website Planning & Design Proposal

Title Page

KhetHub Internship Program 2026

Task 1: KhetHub Website Planning & Design Challenge

Submitted By: Pranshu Tyagi

Role: Web Development / Backend Development Intern

Submission Date: 23 June 2026

Introduction

KhetHub is a digital agriculture platform aimed at empowering farmers through technology. The proposed website will serve as a one-stop solution for farmers by providing agricultural guidance, market insights, weather updates, government scheme information, and expert consultation. The website will be user-friendly, responsive, and accessible to farmers across different regions.

Homepage Structure

1. Hero Section

- KhetHub Logo
- Navigation Menu
- Attractive Agriculture Banner
- Call-to-Action Button: "Get Started"

2. About Us

- Introduction to KhetHub
- Mission and Vision

3. Services Section

- Crop Advisory
- Market Price Information
- Weather Updates
- Government Scheme Support
- Expert Consultation

4. Features Section

- Real-Time Weather Forecast
- Crop Disease Detection
- Farmer Community Forum

- Market Price Tracking
- Multilingual Support

5. Testimonials

- Reviews and Success Stories from Farmers

6. Contact Us

- Contact Form
- Email Address
- Phone Number

7. Footer

- Social Media Links
- Privacy Policy
- Copyright Information

Feature Suggestions

1. Smart Crop Advisory System

Personalized recommendations for sowing, irrigation, fertilization, and harvesting.

2. Crop Disease Detection

Farmers can upload crop images to identify diseases and receive treatment suggestions.

3. Live Market Prices

Real-time mandi prices to help farmers sell their produce at the best rates.

4. Weather Forecast and Alerts

Weather predictions and emergency alerts for rainfall, storms, and heatwaves.

5. Government Scheme Assistant

Information about subsidies, loans, crop insurance, and agricultural schemes.

Additional Features

- Farmer Community Discussion Forum
- Soil Health Analysis
- Fertilizer Recommendations
- Multilingual Support (Hindi & English)

Design Ideas

Website Theme

Modern Agriculture and Smart Farming

Color Palette

- Green (#2E7D32)
- Light Green (#81C784)
- White (#FFFFFF)
- Brown (#8D6E63)

Fonts

- Poppins
- Roboto

Design Principles

- Clean User Interface
 - Mobile-Friendly Layout
 - Easy Navigation
 - Fast Loading Speed
 - Accessible Design for Farmers
-

Technical Approach

Frontend

- HTML5
- CSS3
- JavaScript
- React.js

Backend

- Node.js
- Express.js

Database Design

Users Table

- User ID
- Name
- Email

- Password
- Role

Crops Table

- Crop ID
- Crop Name
- Disease Information

Market Prices Table

- Market ID
- Crop Name
- Current Price
- Location

APIs

- User Registration API
- Login API
- Weather API
- Market Price API
- Crop Disease API

Authentication

- JWT Authentication
- Password Encryption
- Secure User Sessions

Architecture

Frontend (React)

Backend (Node.js + Express)

Database (MySQL)

External Services (Weather API, Market APIs)

Conclusion

The proposed KhetHub website will provide farmers with a modern digital platform that simplifies agricultural decision-making. Features such as weather forecasting, crop disease detection, market price tracking, and expert consultation will help improve productivity and profitability. The platform will be scalable, secure, and user-friendly, enabling farmers to access essential agricultural services efficiently.

Thank You
