KhethHub Internship Program 2026

Task 5 – Smart Agriculture Business Model Challenge

Executive Summary

KhethHub is an AI-powered digital agriculture platform that connects farmers, buyers, agricultural businesses, government organizations, and service providers on one platform.

The goal is to improve farmers' income through technology while creating a profitable and scalable business.

1. Target Customers

Customer Segment	Importance
• Farmers	• Primary users who need crop advice, marketplace access, weather alerts, and better prices.
• FPOs (Farmer Producer Organizations)	• Help onboard thousands of farmers simultaneously and increase platform adoption.
• Agri Businesses	• Can sell seeds, fertilizers, pesticides, and farm inputs directly.
• Equipment Rental Providers	• Rent tractors, harvesters, drones, and machinery to farmers.
• Seed & Fertilizer Companies	• Reach verified farmers for targeted sales and promotions.
• Buyers & Wholesalers	• Purchase crops directly from farmers, reducing middlemen.
• Government Organizations	• Use the platform to deliver schemes, subsidies, and agricultural information.

2. Value Proposition

Problems Solved

- Low crop prices
 - Lack of market access
 - Poor crop planning
 - Weather uncertainty
 - Fake agricultural products
 - Limited access to experts
-

Unique Selling Proposition (USP)

One Digital Platform for Everything a Farmer Needs

Features include:

- AI Crop Advisory
 - Weather Forecast
 - Marketplace
 - Equipment Rental
 - Soil Analysis
 - Crop Disease Detection
 - Government Scheme Updates
 - Direct Buyer Connection
-

Benefits for Farmers

- Better crop prices
 - Lower farming costs
 - AI recommendations
 - Direct buyers
 - Faster equipment booking
 - Better productivity
-

Benefits for Business Partners

- Access to verified farmers

- Digital advertising
 - Sales analytics
 - Larger customer reach
 - Better customer engagement
-

Why Choose KhetHub?

Unlike many competitors that solve only one problem, KhetHub combines multiple services into a single platform.

3. Revenue Streams

1. Marketplace Commission

KhetHub charges **2–5% commission** on every successful transaction.

Example:

Farmer sells crops worth ₹10,000

Commission = ₹300 (3%)

2. Premium Subscription

Premium users receive:

- Advanced AI
 - Unlimited crop reports
 - Disease prediction
 - Market insights
 - Priority support
-

3. AI Advisory Services

Personalized farming consultation.

Monthly AI reports.

Crop planning.

Yield prediction.

4. Equipment Rental Commission

Commission on every tractor or machinery booking.

Example:

Rental = ₹3000

Commission = ₹150

5. Advertisement

Agriculture companies pay for:

- Banner Ads
 - Sponsored Products
 - Featured Listings
-

6. Government Partnerships

Digital implementation of schemes.

Farmer registration.

Survey services.

Data collection.

7. Enterprise Dashboard

Subscription for:

- Agri companies
 - Banks
 - Insurance firms
 - NGOs
-

8. Data Analytics

Anonymous agricultural insights:

- Crop trends
 - Soil health
 - Weather analytics
-

4. Pricing Strategy

Free Plan

Features:

- Weather updates
- Marketplace browsing
- Government schemes
- Basic AI advice

Price:

₹0

Premium Plan

Features:

- Advanced AI
- Unlimited reports
- Expert consultation
- Price prediction
- Crop health monitoring

Price:

₹199/month

or

₹1999/year

Equipment Commission

3–5%

Marketplace Commission

2–5%

Enterprise Plan

Custom pricing

Starts from

₹50,000/year

Promotional Offers

- First month free
 - Student discount
 - Referral rewards
 - Seasonal offers
-

Why Pricing Works

Affordable for farmers.

High value.

Easy subscription.

Scalable.

5. Customer Acquisition Strategy

Digital Marketing

- Facebook
 - Instagram
 - YouTube
 - WhatsApp
 - Google Ads
-

Referral Program

Invite a farmer.

Earn reward points.

Farmer Meetings

Village awareness programs.

Live demonstrations.

FPO Partnerships

Partner with Farmer Producer Organizations.

Large-scale onboarding.

College Ambassador Program

Agriculture students promote KhetHub.

Campus campaigns.

Influencer Marketing

Agriculture YouTubers.

Farm vloggers.

Experts.

Government Collaboration

Agriculture departments.

NGOs.

6. Marketing Strategy

Online Marketing

SEO

Blogs

Videos

Email Marketing

Mobile Notifications

Offline Marketing

Village camps

Farm exhibitions

Agricultural fairs

Posters

Training workshops

Branding Strategy

Tagline:

"Smart Farming, Better Future"

Brand values:

- Trust
- Innovation
- Simplicity
- Growth

Community Building

Farmer discussion forums.

Monthly webinars.

Success stories.

Awards.

Content Marketing

Weekly blogs.

Weather tips.

Crop guides.

YouTube tutorials.

AI farming tips.

7. Competitor Analysis

Competitor Services		Strengths	Weaknesses	KhetHub Advantage
DeHaat	Inputs, advisory	Large network	Limited personalization	AI + marketplace + rentals
AgroStar	Farm inputs	Strong app	Focus on input sales	Complete farming ecosystem
Ninjacart	Supply chain	Strong logistics	Buyer-focused	Farmer-first platform

Competitor Services		Strengths	Weaknesses	KhetHub Advantage
BigHaat	Online agri store	Wide product range	Limited AI	Smart recommendations
Krishify	Farmer community	Active community	Limited marketplace	Integrated AI and commerce

Competitive Advantage

- AI-powered advisory
 - Equipment rental
 - Marketplace
 - Community
 - Government integration
 - Weather intelligence
 - Crop disease detection
-

8. Financial Projection (1 Year)

Assumptions

Users:

50,000

Premium Users:

5,000

Marketplace Transactions:

₹2 Crore

Revenue Forecast

Revenue Source	Estimated Revenue
Marketplace Commission	₹6,00,000
Premium Subscription	₹99,95,000
Equipment Commission	₹8,00,000
Advertisement	₹15,00,000

Revenue Source	Estimated Revenue
Enterprise Partnerships	₹25,00,000
AI Advisory	₹12,00,000
Total Revenue	₹1,65,95,000

Expenses

Expense	Amount
Salaries	₹55,00,000
Marketing	₹25,00,000
Cloud Infrastructure	₹10,00,000
Technology Development	₹20,00,000
Operations	₹12,00,000
Customer Support	₹8,00,000
Miscellaneous	₹5,00,000
Total Expenses	₹1,35,00,000

Estimated Profit

Revenue:

₹1,65,95,000

Expenses:

₹1,35,00,000

Estimated Profit: ₹30,95,000

Bonus 1 – SWOT Analysis

Strengths	Weaknesses
AI technology	New brand

Strengths	Weaknesses
Multiple services	Initial funding required
Farmer-focused	Technology adoption in rural areas

Opportunities	Threats
Digital India	Strong competitors
Government support	Price competition
Smart farming	Climate uncertainty

Bonus 2 – Business Model Canvas

Key Partners	FPOs, Agri Companies, Government, Equipment Providers
Key Activities	AI Development, Marketplace, Marketing
Key Resources	Technology, Data, Experts
Value Proposition	One-stop digital farming platform
Customer Relationships	Mobile App, WhatsApp, Customer Support
Channels	Website, App, Social Media
Customer Segments	Farmers, Buyers, FPOs, Businesses
Revenue Streams	Subscription, Commission, Ads
Cost Structure	Salaries, Marketing, Cloud, Development

Bonus 3 – Go-to-Market Strategy

Phase 1: Pilot in 5 districts.

Phase 2: Expand across one state.

Phase 3: Scale to all of India.

Bonus 4 – Growth Roadmap

Year 1

- 50,000 users
- 5 states
- AI advisory

Year 2

- 2 lakh users
- Equipment rental nationwide
- Crop insurance

Year 3

- 10 lakh users
- Export marketplace
- Drone services
- AI satellite monitoring

Bonus 5 – Investor Pitch

Vision: Empower every farmer with smart technology.

Mission: Build India's most trusted digital agriculture ecosystem.

Problem: Farmers struggle with low income, fragmented services, and limited access to technology.

Solution: A unified platform offering AI advisory, marketplace, equipment rental, weather intelligence, and direct buyer connections.

Market Opportunity: India has over 140 million farmers, representing a massive addressable market for digital agriculture solutions.

Business Model: Revenue from subscriptions, marketplace commissions, enterprise partnerships, AI services, and advertising.

Competitive Edge: End-to-end agriculture ecosystem powered by AI and data.

For this business model assignment, you don't need to create complicated designs. A professional report with tables, flowcharts, graphs, and simple diagrams is enough.

No coding assessment is required.

Here's how to present each section:

1. Target Customers (Table)

Customer Segment	Need	Value Provided
Farmers	Better income	AI advisory, marketplace
FPOs	Manage farmers	Bulk onboarding

Customer Segment	Need	Value Provided
Buyers	Quality produce	Direct sourcing
Agri Businesses	More customers	Advertising & sales
Government	Farmer outreach	Digital scheme delivery

2. Value Proposition (Diagram)

3. Revenue Streams (Pie Chart)

Show how revenue is expected to come from different sources.

Example:

- Premium Subscription – 35%
- Marketplace Commission – 25%
- Equipment Rental – 15%
- Advertisement – 10%
- Enterprise Partnerships – 10%
- AI Advisory – 5%

A pie chart is ideal here.

4. Pricing Strategy (Table)

Plan	Price	Features
Free	₹0	Weather, Marketplace
Premium	₹199/month	AI Reports, Expert Advice
Enterprise	Custom	Dashboard & Analytics

5. Customer Acquisition (Flowchart)

6. Marketing Strategy (Mind Map)

7. Competitor Analysis (Comparison Table)

Feature	KhetHub	DeHaat	AgroStar	Ninjacart	BigHaat
AI Advisory	✓	✓	✗	✗	✗
Marketplace	✓	✓	✗	✓	✓
Equipment Rental	✓	✗	✗	✗	✗
Weather Alerts	✓	✓	✓	✗	✗
Government Schemes	✓	✗	✗	✗	✗

8. Financial Projection (Bar Graph)

A bar graph can compare expected revenue from each source.

9. Growth Roadmap (Timeline)

2026

- |
- └─ Launch MVP
- └─ 50,000 Users
- └─ 5 States

2027

- |
- └─ 2 Lakh Users
- └─ AI Expansion
- └─ Insurance

2028

- |
- └─ 10 Lakh Users
- └─ Drone Services
- └─ Export Marketplace

10. SWOT Analysis (2×2 Matrix)

Strengths	Weaknesses
AI Platform	New Brand
One-stop Solution	Limited Initial Funding
Opportunities	Threats
Digital India	Competition
Government Support	Climate Risks

11. Business Model Canvas

Key Partners	Key Activities	Value Proposition
FPOs	AI Development	Smart Farming Platform
Customer Relationship	Customer Segments	Channels
Support & Community	Farmers	App, Website
Revenue Streams	Cost Structure	
Subscription, Commission	Marketing, Technology	

Short notes
